1957

Health Department,  
Municipal Buildings,  
Gillingham, Kent.

September, 1957.

To the Mayor, Aldermen and Councillors.

Mr. Mayor, Ladies and Gentlemen,

I have the honour to submit my Annual Report for the year ending 31st December, 1956.

The birth rate was 15.4 per 1,000 of the civilian population compared with 14.0 in 1955.

The death rate was 10.5 per 1,000 of the civilian population and the death rate of infants under one year was 19.2 per 1,000 live births, the lowest recorded figure for the Borough, compared with 33.8 in the previous year.

It was a particularly satisfactory year for infectious diseases. One case of poliomyelitis was notified, no cases of diphtheria and a reduced number of scarlet fever cases. Measles and whooping cough were also very few in number.

Further progress was made in slum clearance during the year. Ten clearance areas comprising 90 houses and details in respect of the condition of 62 houses were represented to the Health Committee.

I take this opportunity of thanking the Council for their support and my staff for the assistance they have rendered me.

I am,

Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

M. L. DUNLOP,

## SANITARY CIRCUMSTANCES OF THE AREA

### Water Supply.

Is provided by the Medway Water Board and thirty-four water samples were taken during the year; 15 from the Gillingham area and 19 from the Rainham area. All proved satisfactory.

22,603 dwellings are supplied directly from the mains, this is 99.9% of the total number of dwellings in the Borough, which consist of:—

Houses	...	...	...	...	21,453
Houses and shops	...	...	...	...	594
Houses and business premises	...	...	...	...	479
Licensed houses	...	...	...	...	86
Boarding houses	...	...	...	...	6
<hr/>					
Total dwellings	...	...	...	...	22,618
<hr/>					

### Drainage and Sewerage.

The district is mainly drained to a sewage works situated within this Borough at Motney Hill. The sewage disposal plant is also used jointly by the Rochester and Chatham authorities.

There has been a considerable extension of the main sewers during the year but this generally has been for the purpose of estate development.

Some isolated parts of the district remain unsewered and for the houses in these areas a cesspool emptying service is provided.

### Refuse Disposal.

The collection and disposal of house and trade refuse is administered by the Borough Engineer. There is a fleet of modern vehicles. Disposal takes place, by controlled tipping, in a chalk quarry in a residential section of the district. Great care is exercised in order to prevent any circumstance arising that might be detrimental to public health.

## **Public Health Inspection.**

This portion of the report has been prepared by Mr. F. J. Hedgecock, Chief Public Health Inspector.

### **Foreword.**

There has been a considerable decrease in the number of applications for Certificates of Disrepair during the year 1956; 8 compared with 73 for the previous year. This has given the opportunity for Housing Act procedure to be applied in relation to premises where disrepair certificates have been granted.

I am able to report that a satisfactory year has been experienced from the aspect of food hygiene. It has been the departments' policy to pursue an educational course for food handlers and I am pleased to be able to state that a great deal of co-operation has been received from all persons concerned.

The unfortunate domestic conditions under which a number of aged persons exist, is a matter of considerable concern to the department.

The shortage of inspectorial staff continues to retard systematic progress in improving environmental conditions. This is not only a local problem but also a national one.

### **Inspection and Supervision of Food.**

On the register of food shops there are 609 premises from which food is sold excluding public houses, off licences, chemists and clubs. These comprise as follows:—

- 42 Cafés and Kitchens.
- 30 Fishmongers.
- 34 Bakers, Pastry Cooks and Confectioners.
- 64 Butchers' Shops, including three travelling shops.
- 118 Grocers, including four multiple shops and two travelling shops.
- 65 Fruiterers and Greengrocers.
- 256 General Shops.
